DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 drawn to a fastener, classified in class 411, subclass 500.
 - II. Claims 9-20 drawn to a fastener assembly, classified in class 206, subclass 343.
 - III. Claims 21-38, drawn to a fastener attaching device, classified in class 227, subclass 067.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I,II and III are unrelated or distinct. Inventions are unrelated or distinct if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of each Group I,II & III rely upon particular subject matter for patentability which are not set forth in the other Groups.

Specifically, Groups I,II rely upon the specific limitations of a fastener such as a tag holding portion, a filament portion or the configuration of a bulged portion and/or fastener assembly having a plurality of fasteners arranged parallel to each other which are not set forth in Group III. Group III relies upon the specific limitations of an attaching device such as an operating lever, a hollow needle and a pushing pin passage which are not set forth in Groups I,II.

3. Each of the Groups I, II, III are further restricted below as each group contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1-8, contains;

Art Unit: 3721

Species I Figures 1, 2a, 4a, 4j, 4k, 4g, 4h

Species II Figures 2b, 3, 4b

Species III Figures 4c, 4d, 4e,

Species IV Figure 4f

Species V Figures 4i, 4l, 4m, 4n, 4o

Group II, claims 9-20, contains;

Species I Figures 14a, 14b, 15a, 15b, 15c, 15d

Species II Figures 14c, 14d, 14e

Group III, claims 21-38, contains;

Species I Figures 16a, 16b

Species II Figure 17

Species III Figure 18

Species IV Figure 24

Species V Figure 25

Species VI Figures 29a, 29b, 30a, 30b

Figures 19a-c, 20a-b, 21a-b, 22 and 23a-b are generic to all Species of Group III.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic.

Art Unit: 3721

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Art Unit: 3721

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
